ALUCA

EASE YOUR WORK. A LEADER IN QUALITY FOR OVER 30 YEARS IN ALUMINIUM VEHICLE EQUIPMENT AND A SOLUTION PARTNER FOR MOBILE SERVICE TECHNICIANS.

ALUCA is a company that specialises in the development and manufacture of customised vehicle equipment. Thanks to our strong partners, we are always close at hand and offer solutions for optimising commercial vehicles, especially for craft businesses and mobile service providers. We attach great importance to quality, functionality and safety, using high-quality materials such as aluminium to ensure durable and lightweight products.

System ALUCA

System ALUCA is an aluminium vehicle equipment system that can be individually adapted to the industry and customer. It offers tailor-made solutions for maximum efficiency and flexibility. It can be individually adapted to the specific needs of each individual, both in terms of daily work processes and the materials and tools to be transported. Adaptable to specific industries, it optimises payload through a lightweight approach. The value-adding elements and accessories increase efficiency and simplify work processes.

aluDB

aluDB is an innovative drawer solution that makes optimal use of existing storage space while also making it readily accessible. This ‘underfloor’ drawer solution offers large-capacity drawers for maximum organisation and accessibility, even when fully loaded. The well-thought-out design enables ergonomic storage of equipment and materials, while robust drawers with a high surface load of up to 80 kg and a load-bearing base of up to 700 kg are impressive. Anti-slip mats and safety mechanisms ensure order and safety. ALUCA aluDB is the ideal solution for compact commercial vehicles that need to be efficient and flexible in urban environments.

aluDOCK

aluDock by Aluca is an innovative case integration system for vehicle equipment that offers a flexible and secure way to store various case systems in the vehicle. By easily integrating tool cases from different manufacturers, aluDOCK ensures order, quick access and safe transport.

metaLINK

The metaLINK from ALUCA is a hybrid adapter plate that allows case systems from different manufacturers to be integrated into ALUCA shelving systems. It ensures quick and easy connection and enables the seamless integration of different case systems into the vehicle interior.

metaCONNECT

The patent-pending metaConnect securing set from ALUCA enables metaBOXes to be docked into ALUCA systems without adapter plates. Other types of cases can be secured using an adapter plate, the metaLINK. The metaCONNECT set is part of ALUCA’s modular and lightweight case system, which offers a robust and organised way to transport and store tools and accessories.

ALUCA

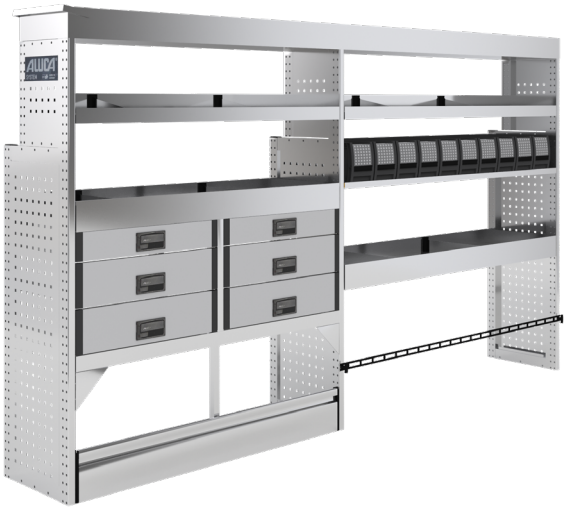
EASE YOUR WORK. A LEADER IN QUALITY FOR OVER 30 YEARS IN ALUMINIUM VEHICLE EQUIPMENT AND A SOLUTION PARTNER FOR MOBILE SERVICE TECHNICIANS.

ALUCA is a company that specialises in the development and manufacture of customised vehicle equipment. Thanks to our strong partners, we are always close at hand and offer solutions for optimising commercial vehicles, especially for craft businesses and mobile service providers. We attach great importance to quality, functionality and safety, using high-quality materials such as aluminium to ensure durable and lightweight products.

THE MATERIAL - ALUMINIUM

ALUCA vehicle equipment is made of aluminium. Aluminium is extremely wear-resistant and corrosion-resistant. It is also much lighter than other metals with comparable properties and is 100% recyclable. We leave nothing to chance when it comes to processing – from laser cutting to final inspection, our experts guarantee first-class quality. That's why we can simply give you an 8-year premium warranty* on the vehicle equipment. That's unique.

*For detailed information about our terms and conditions, please visit our information page: https://www.aluca-world.com/en/warranty-conditions/



Sustainability

ALUCA vehicle equipment stands for a deep commitment to sustainability. By using aluminium, which is both lightweight and fully recyclable, we contribute to reducing fuel consumption, energy consumption and CO_2 emissions. Our products are characterised by their durability, which minimises the need for frequent new purchases and promotes waste prevention.

As an ISO 14001-certified company, we are electrifying our car fleet to further reduce CO_2 emissions. In addition, we use geothermal energy and operate a photovoltaic system with a peak output of 300 kW to reduce our ecological footprint.

ALUCA

System ALUCA

The ALUCA system is an aluminium vehicle equipment system that is individually tailored to the industry and customer, personalised and coordinated as a solution for process optimisation. Thanks to its reduced weight, it enables a higher payload and offers the option of converting commercial vehicles into mobile workshops or warehouses.

Founded in 1993
+ 200 employees
Represented in + 20 countries
100% aluminium

Locations:
Germany,
Austria, Netherlands,
France, United
Kingdom

Modular system: ALUCA is based on a modular system that can be individually adapted to different vehicle types and requirements. This enables efficient use of the available space in the vehicle.

Customised design: Customised heights, depths and widths are available, as well as a large selection of accessories, case systems and load securing devices to create tailor-made solutions.

Lightweight construction: The use of aluminium reduces the weight of the vehicle equipment, which can lead to a higher payload, better energy efficiency and fuel savings.

Durability and robustness: Aluminium is wear-resistant and corrosion-resistant, which ensures a long service life for the equipment.

Optimised use of space: The equipment helps to make efficient use of the cargo space and enables clear organisation of tools and materials. This has been proven to lead to higher productivity

High safety: The ALUCA system is crash-tested and contributes to load securing.

8-year premium warranty: ALUCA offers an 8-year warranty* on its vehicle equipment.

Individual consultation and planning: Customers are supported in the planning and implementation of their equipment, both on site and via video call.

aluDB

aluDB is an innovative solution for vehicle equipment that offers optimal organisation and accessibility thanks to its large drawers. Even when the loading area is fully loaded, everything remains accessible at all times. The double floor keeps the load area tidy. The well-thought-out design allows equipment, materials and accessories to be stored ergonomically and safely, significantly increasing efficiency in everyday work.

Founded in 1993
+ 200 employees
Represented in + 20 countries
100% aluminium

Locations:
Germany,
Austria, Netherlands,
France, United
Kingdom

- **Large drawers:** Offer maximum storage space and loading capacity and make organisation easier.
- **Ergonomics:** Easy access to tools and materials without having to bend, stretch or kneel, thanks to their placement on the vehicle floor.
- **Accessibility:** Even when fully loaded and with a full loading area, tools and equipment remain accessible at all times.
- **Robust construction:** Made of high-quality aluminium for durability and reliability with a load capacity of 80 kg for each individual drawer.
- **Flexibility:** The smaller the vehicle, the more flexible and efficient the vehicle equipment must be.
- **Loading area:** The aluDB system continues to offer loading area for full use.

ALUCA

aluDOCK

aluDOCK from ALUCA is an innovative case integration system for vehicle interiors that offers a flexible and secure way to store various case systems in the vehicle. It enables the easy integration of tool cases from different manufacturers on shelves and ensures order, quick access and safe transport.

Founded in 1993
+ 200 employees
Represented in + 20 countries
100% aluminium

Locations:
Germany,
Austria, Netherlands,
France, United
Kingdom

- **Flexible integration:** aluDock can accommodate cases from various manufacturers, not just the ALUCA metaBOX.
- **Order and clarity:** The system creates order in the vehicle and enables quick access to tools and equipment.
- **Safety:** aluDock ensures safe transport of tools by anchoring them securely in the vehicle.
- **Efficiency & ergonomics:** The ability to easily remove and stow cases increases efficiency on the construction site. Easy handling and quick access to tools facilitate workflows.
- **Retrofit solution:** aluDOCK includes various elements for holding cases. These include case racks, case shelves, metaCONNECT and metaLINK.
- **metaBOX integration:** In conjunction with the ALUCA metaBOX system, the transport of tools between the vehicle, construction site and workshop is made considerably easier.

ALUCA

metaLINK

The metaLINK from ALUCA is a hybrid adapter plate that allows case systems from different manufacturers to be integrated into the ALUCA vehicle interior .It ensures quick and easy connection and enables the seamless integration of different case systems.

Founded in 1993
+ 200 employees
Represented in + 20 countries
100% aluminium

Locations:
Germany,
Austria, Netherlands,
France, United
Kingdom

- **Integration of third-party systems:** metaLINK enables the use of case systems from other case manufacturers in the ALUCA system. TSTAK from DeWalt, T-LOC from Tanos, HIT-System from HiKOKI, L-BOXX from BS Systems and MakPac from Makita can be incorporated into metaLINK.
- **Quick and easy connection:** The adapter plate ensures uncomplicated assembly and disassembly.
- **Compatibility with ALUCA metaBOX:** metaLINK enables the connection of ALUCA metaBox cases.
- **Increased flexibility:** The integration of different case systems makes vehicle equipment more flexible and versatile. This also makes transport to the construction site easier, as different systems from different manufacturers can be connected to each other.
- **Stable and robust solution:** ALUCA products are known for their stability and durability.

INTEGRATION OF THIRD-PARTY CASE SYSTEMS

ROBUST, DURABLE & RELIABLE

FLEXIBILITY & SECURITY

WIDE RANGE OF ACCESSORIES

metaCONNECT

An innovative solution is to dock metaBOXes directly into ALUCA shelves, which simplifies and speeds up the mandatory securing of loads. Craftsmen and professionals benefit from the optimised organisation and quick accessibility of their equipment, which significantly increases efficiency in their daily work.

- **Function:** Enables ALUCA metaBoxes to be attached directly to ALUCA shelves.
- **Compatibility:** Can be used with other types of cases via the metaLink adapter plate.
- **System:** Part of ALUCA's modular and lightweight case system.
- **Advantages:** Offers flexibility and security for equipment and can be retrofitted to almost any flat surface.
- **Applications:** Suitable for tradespeople and professionals who need to transport and store tools and accessories.

ALUCA

metaBOX

The ALUCA metaBox is an intelligent transport and storage system for mobile use that impresses with its robustness and break resistance. The case system offers optimum protection for tools and accessories. metaBox achieves protection class IP43 and also protects the contents from dirt and moisture. They are easy to stack, connect and carry close to the body thanks to a comfortable front handle.

Founded in 1993
+ 200 employees
Represented in + 20 countries
100% aluminium

Locations:
Germany,
Austria, Netherlands,
France, United
Kingdom

- **Robust and break-proof:** Made from durable plastic, the metabox offers maximum protection for its contents.
- **Stackable and connectable: T**he boxes can be easily connected to each other and stacked.
- **Protection against dirt and moisture:** The IP43 protection class ensures that the contents are protected from external influences.
- **Easy to handle:** A comfortable front handle makes it easy to carry, and one box in the stack can be opened without having to disconnect the others.
- **Versatile applications:** metaBoxes are available in various sizes and can be combined with other aluDock systems such as metaCONNECT or metaLink.
- **UN certification:** metaBoxes are UN-certified for the safe transport of batteries with over 100 watt hours.
- **Modularity:** metaBoxes are part of a modular case system and, in conjunction with metaLINK, can also be connected to other case systems such as L-Boxx, T-Loc Systainer, T-Stak, MacPac, HiKOKI HIT System, METABO Metaloc and Classic Systainer.
